

PROJECT DEVELOPMENT PHASE

SPRINT 4

TEAM ID	PNT2022TMID17653
PROJECT NAME	Smart Fashion Recommender Application

1. Sendgrid integration with python

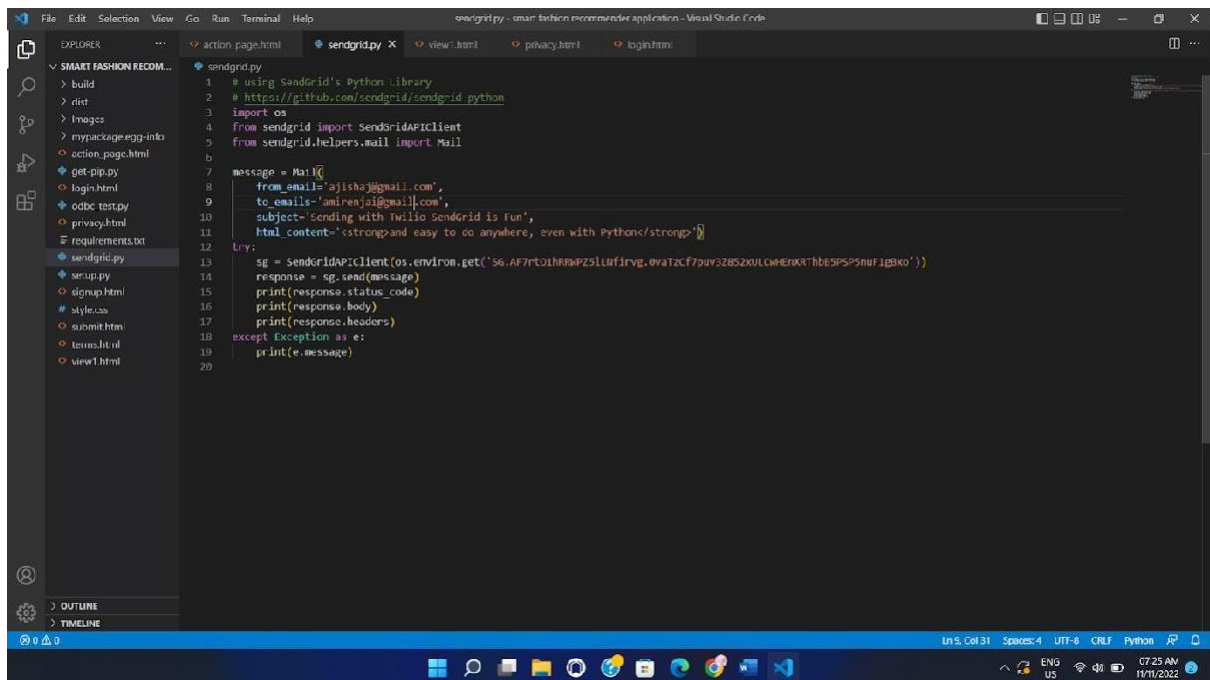

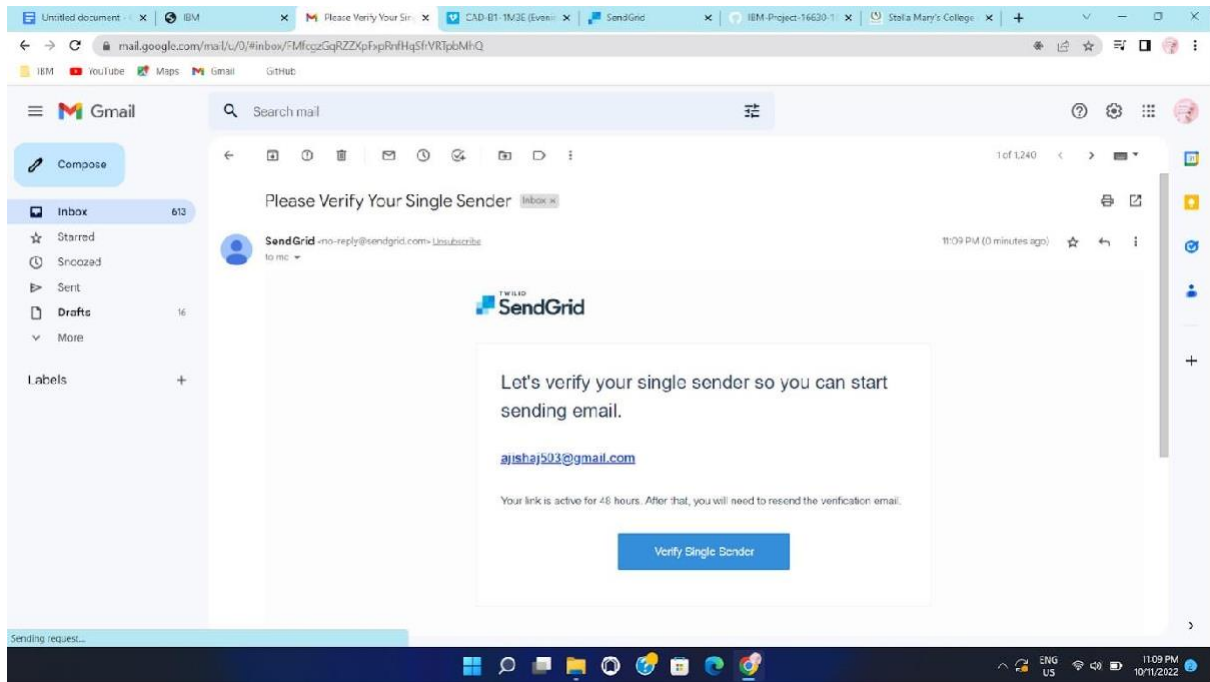

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Install the latest PowerShell for new features and improvements! https://aka.ms/PSWindows

PS C:\Windows\system32> pip install sendgrid
Collecting sendgrid
  Downloading sendgrid-6.9.7-py3-none-any.whl (101 kB)
    -----101.1/101.1 kB 447.4 kB/s eta 0:00:00
Collecting python-http-client<3.2.1
  Downloading python-http-client-1.1.1-py3-none-any.whl (8.4 kB)
Collecting starkbank-ecdsa<2.0.1
  Downloading starkbank-ecdsa-2.2.0.tar.gz (14 kB)
  Preparing metadata (setup.py) ... done
Installing collected packages: starkbank-ecdsa, python-http-client, sendgrid
  DEPRECATION: starkbank-ecdsa is being installed using the legacy 'setup.py install' method, because it does not have a 'pyproject.toml' and the 'wheel' package is not installed. pip 23.1 will enforce this beha
  vour change. A possible replacement is to enable the '--use-pep517' option. Discussion can be found at https://github.com/pypa/pip/issues/8559
  Running setup.py install for starkbank-ecdsa ... done
Successfully installed python-http-client-3.3.7 sendgrid-6.9.7 starkbank-ecdsa-2.2.0

[notice] A new release of pip available: 22.3 -> 22.3.1
[notice] To update, run: python.exe -m pip install --upgrade pip
PS C:\Windows\system32>
```

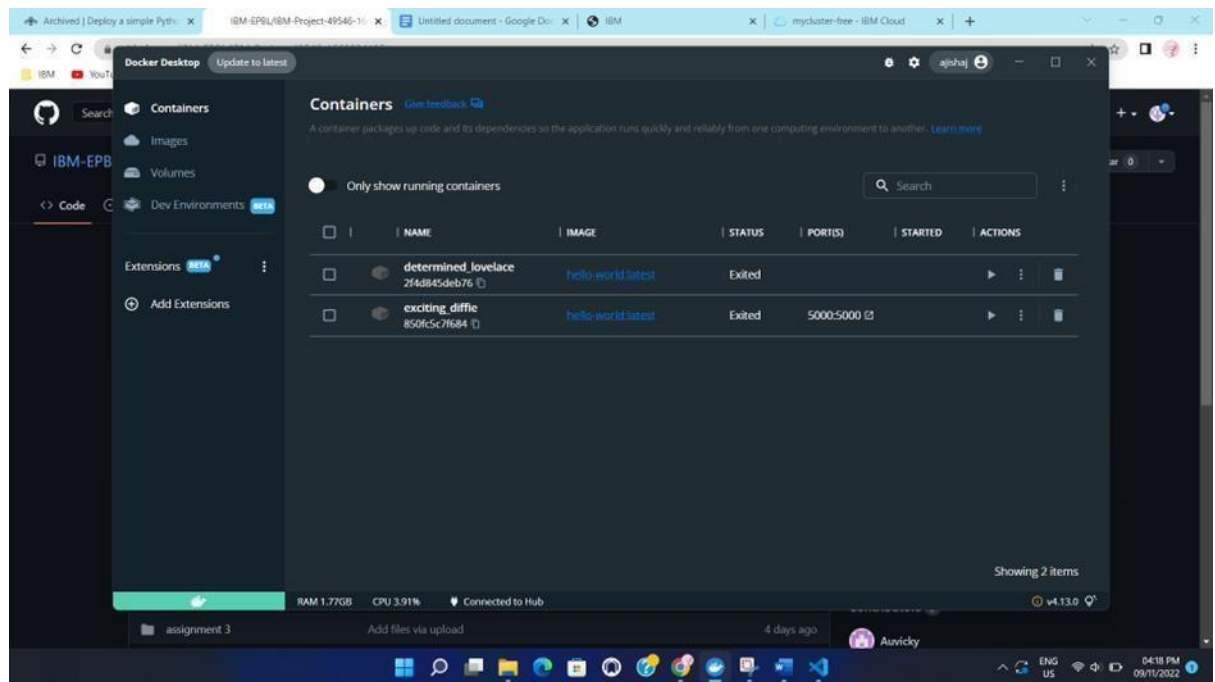

2. Containerize the application

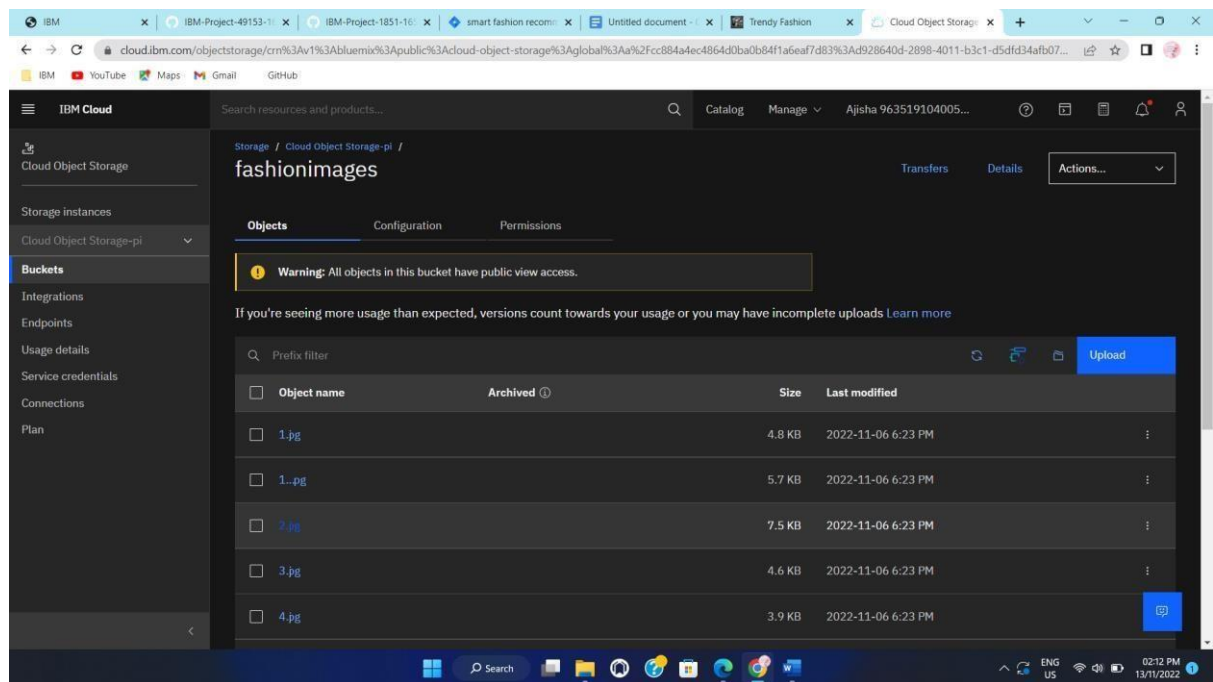

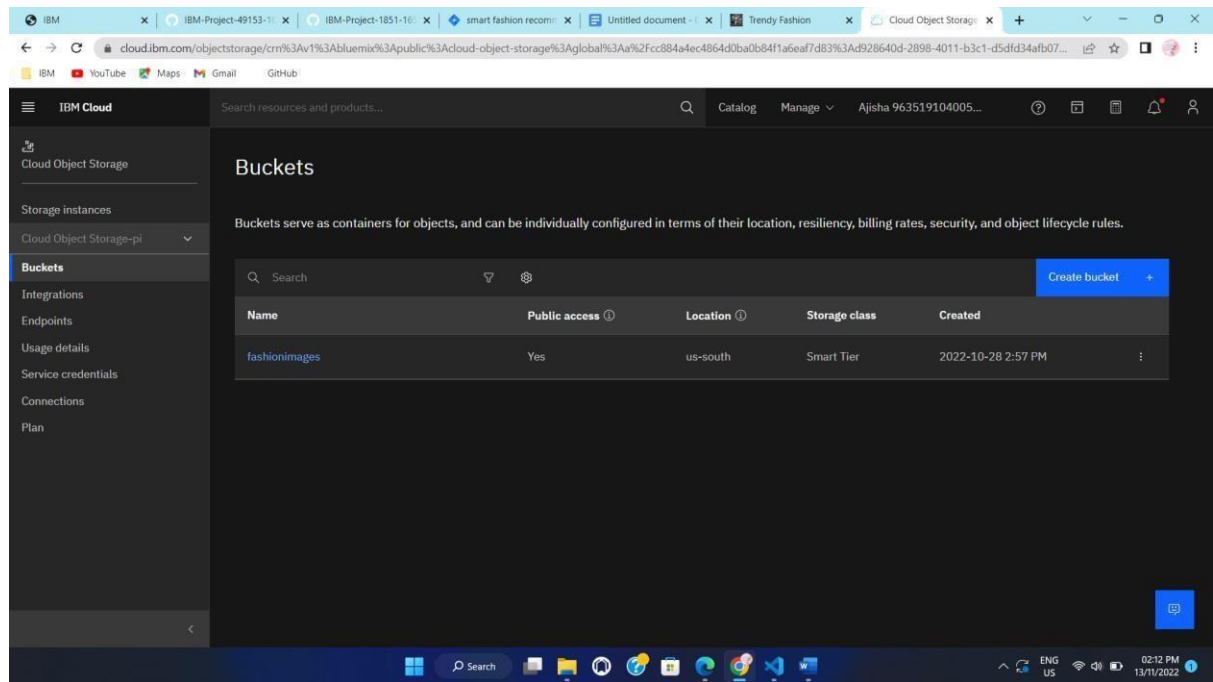

The screenshot shows the Visual Studio Code editor with a Dockerfile for a Flask application. The Dockerfile is located in the 'Dockerfile' file in the 'venv' directory. The code in the Dockerfile is as follows:

```
1 FROM python:2.7
2 LABEL maintainer="Kunal Malhotra, kunal.malhotra@ibm.com"
3 RUN apt-get update
4 RUN mkdir /app
5 WORKDIR /app
6 COPY . /app
7 RUN pip install -r requirements.txt
8 EXPOSE 5000
9 ENTRYPOINT [ "python" ]
10 CMD [ "app.py" ]
```

The terminal window shows the Docker daemon's help text for the 'docker run' command, listing various options such as --runtime, --security-opt, --shm-size, --sig-proxy, --stop-signal, --stop-timeout, --storage-opt, --sysctl, --tmpfs, --tty, --ulimit, --user, --users, --uts, --volume, --volume-driver, --volumes-from, --workdir, and --help.

3. Upload images to cloud

4. Create responsive design for the application

```
